Profile

Software Engineer with a degree in Software Engineering and Information Systems and hands-on experience developing full-stack applications, REST APIs, and microservices. Skilled in Java/Spring Boot, C/.NET, Angular, PostgreSQL, RabbitMQ, Docker, and CI/CD. Experienced in backend development, asynchronous communication, database integration, and application testing, with a strong interest in clean code, maintainable architecture, and continuous improvement.

Professional Experience

•Full Stack Developer *10/2025 – 07/2026*
IFBW — Tactilia Project Tunis, Tunisia

- Contributed to a microservices-based Computer-Aided Dispatch (CAD) platform supporting emergency-service incident management and dispatching.
- Developed backend REST APIs and business features for incident management, resource allocation, and real-time tracking of emergency units.
- Implemented asynchronous, event-driven communication between services using RabbitMQ to support operational workflows.
- Technologies: **Java, Spring Boot, Angular, TypeScript, RabbitMQ, PostgreSQL, Docker, Jenkins.**

•Full Stack Developer (Final Year Internship) *02/2025 – 07/2025*
Addinn Tunis, Tunisia

- Designed and implemented a modular microservices architecture to automate the debt recovery process.
- Applied Clean Architecture and CQRS/MediatR patterns to structure backend services.
- Developed interactive dashboards for monitoring operational processes and decision support
- Integrated **Camunda** to automate and orchestrate business processes across the application.
- Technologies: **.NET, C#, Angular, keycloak, PostgreSQL, Docker, Camunda BPMN, REST APIs, Microservices**.

•Software Engineer Intern *06/2024 – 08/2024*
ST2I Les Berges du Lac, Tunisia

- Developed backend services using Spring Boot for distributed application workflows and database management.
- Implemented data synchronization and consistency mechanisms across decentralized database components.
- Technologies: **Docker, MySQL, Spring Boot, RabbitMQ**.

•Software Engineer Intern *07/2023 – 08/2023*
ST2I Les Berges du Lac, Tunisia

- Designed and developed an online registration web application for scholarship management.
- Implemented a multi-actor system with two user roles.
- Developed secure REST APIs for backend–frontend communication.
- Technologies: **Spring Boot, Angular, MySQL**.

•Full Stack Developer (Freelance) *01/2023 – 03/2023*
DropSell Tunis, Tunisia

- Developed dynamic frontend components and integrated them with backend services and REST APIs.
- Optimized performance and improved user experience.
- Technologies: **Spring Boot, Ionic, PostgreSQL, Bitbucket**.

•Software Tester (Final Year Internship) *02/2022 – 06/2022*
QualityBox Tunis, Tunisia

- Developed an automated functional testing solution for a mobile e-commerce application.
- Automated end-to-end workflows covering navigation, search, cart, checkout, and payment processes.
- Integrated automated tests into CI/CD pipelines using Jenkins and GitLab and analyzed test results to improve software reliability.
- Technologies: **Robot Framework, Appium, Selenium, TestRail, Jenkins, Sauce Labs, BrowserStack, GitLab**.

Personal Projects

•WorkBridge – Recruitment Platform
A dynamic online platform connecting freelancers and employers, streamlining the recruitment process from job search to collaboration.

- Simplified recruitment through a centralized and intuitive platform.
- Enhanced freelancer–employer interaction via integrated communication tools.
- Efficient job–profile matching using an intelligent search engine.
- Technologies: Angular, Spring Boot, Bootstrap, MySQL.

•MediBridge – Medical Platform
A digital platform connecting patients, doctors, and delivery agents to improve access to healthcare and medication delivery.

– Allows patients to book appointments, access teleconsultations, and order medications online.
– Provides healthcare professionals with tools to manage services and patient interactions.
– Integrated fast and secure delivery tracking system.
– Technologies: React.js, Node.js, Express.js, MongoDB.

Education

•**Engineering Degree in Software Engineering and Information Systems (GLSI)** *2022–2025*
TEK-UP University

•**Bachelor's Degree in Software Engineering and Information Systems (GLSI)** *2019–2022*
University of Sciences of Bizerte
